

Certificate

This product comes from a family glass workshop, which follows up to the traditional handicraft of the Bohemia crystal glass. Individual piece production assures unique products, unrepeatable by other makers.

For decoration with traditional hand techniques are used both raw products of hand formed (blown) lead crystal glass and stemware of sodium-potash glass.

The products are valued up with combination of various decoration techniques - high enamel, hand painting, cover coating glass, decoration with gold or hand cutting. Artistic engraving allows treatment of ornamental or figural motifs. The height of old painting masters' skill is hand drawing of motifs directly on the glass - pen-and-ink drawing, which gives the product an individual art character.

For hand painting ceramic and organic glass colours are used. The special golden effects are achieved by using precious metals - 24-carat gold and platinum. Painting technique of high enamel is characterised by blooms, plastic painted with enamel colours. Painted glass is fired even several times in order to achieve colour stability and durability of decoration. These are very exacting technologies, which requires talent for art, precision and experience of the painters. Decorated glass has utility, decorative and also high artistic value.

Wide assortment of glass products can be decorated - liqueur, tea, beer, wine or other glasses, sets, stemware, tumblers, bottles, jugs, bowls, jars, cups, vases, candlesticks, bells, flacons etc., also according to individual request or design of customers. The products can be manually washed with fine washing-up liquid - sand-free detergent. Washing in a dishwasher is not recommended.
